Context

The primary objective of this subject is to provide students with detailed knowledge about the **different ways a tourism product can be distributed**, as well as the **commercial relationships that are established by the different intermediaries in tourism contracting**.

During this course students will analyse the **different products offered in tourism**, depending on the destinations' different types of segmentation (urban, holiday and mixed products), also the main components of tourism products and services (accommodation, transport, complimentary offers, etc.) and the main players involved in tourism contracting (customers, travel agents, tour operators, incoming agencies, OTA's, Bedbanks, etc.).

After analysing the tourism product and its principal components, students will then examine the **different mechanisms that can be used to distribute the product (sales quotas, guaranteed sales, GDS, CRS, etc.)**, with particular attention paid to the **new distribution channels that have appeared as a result of tIT development (B2C, B2B, OTAs, bed banks, etc.)**.

Lastly, students will study the significant commercial strategies and new areas of study that have arisen in recent years in the sector, such as **Revenue Management, online marketing, the impact of the social media**, etc., although it is just an overview as details are studied in another Marketing subject.

Syllabus

The language of instruction for this course will be English. Students taking this course will learn specific economic /tourism-related vocabulary and develop both their productive and receptive skills in English and therefore acquire further knowledge of the English language
